

Illinois commercial solar

Your bill-review worksheet

Bring this page, 12 months of bills and available interval data to your review.

Facility / address: _____

Utility / supplier: _____ Rate class: _____

Review owner: _____ Review date: _____

1. Establish the bill baseline

Annual purchased energy (kWh): _____ Highest billed demand (kW): _____

Supply-contract renewal: _____ Interval data requested / available: _____

Attach bills and contract. Separate energy, demand, capacity and fixed charges.

2. Match solar to operations

Shift hours / weekends: _____

Shutdowns or planned equipment changes: _____

Roof age / site / ownership or lease considerations: _____

3. Ask for a transparent before-and-after bill

On-site solar use: _____ kWh Exports: _____ kWh Assumptions: _____

Avoided energy charges: _____ Export terms: _____

Peak / capacity effects and remaining charges: _____

Request a lower-benefit scenario and a full model including costs and maintenance.

4. Check the project plan and benefit timing

Site / utility next step: _____ Owner / target date: _____

Planned operating date: _____ Next dependency: _____

Have tax and project teams confirm eligibility, credit rate and placed-in-service facts.

Keep bill savings, tax benefits, REC payments and rebates on separate timelines.

5. Agree on the next decision

Proceed to detailed review / resolve a site or utility question / revisit later

Action: _____ Owner / date: _____

For qualifying new-start solar, plan for service by December 31, 2027.

The federal credit has additional requirements. A signature alone does not secure it.
